The goal of EUHubs4Data is to become the European reference for data driven innovation and experimentation, based on the cross-border collaboration among relevant initiatives in Europe that, ultimately, results in a federation of data driven innovation hubs and contributes actively to the creation of European common Data Spaces.

30 DIHs  20 countries continuously growing...
This programme aims at attracting the demand side (mostly SMEs and start-ups) to make use of the EUH4D federated catalogue, fostering the adoption from regional actors of European cross-cutting data driven technologies to solve specific challenges and improve their services and solutions.

23 SMEs are part of our ecosystem

Last open call
September 2022
